Midl x BTCSummit Hackathon

AGENDA

08:30 - 09:00 Registration & Team Formation

09:00 - 09:30 Opening Remarks

09:30 - 12:30 Hacking Session #1

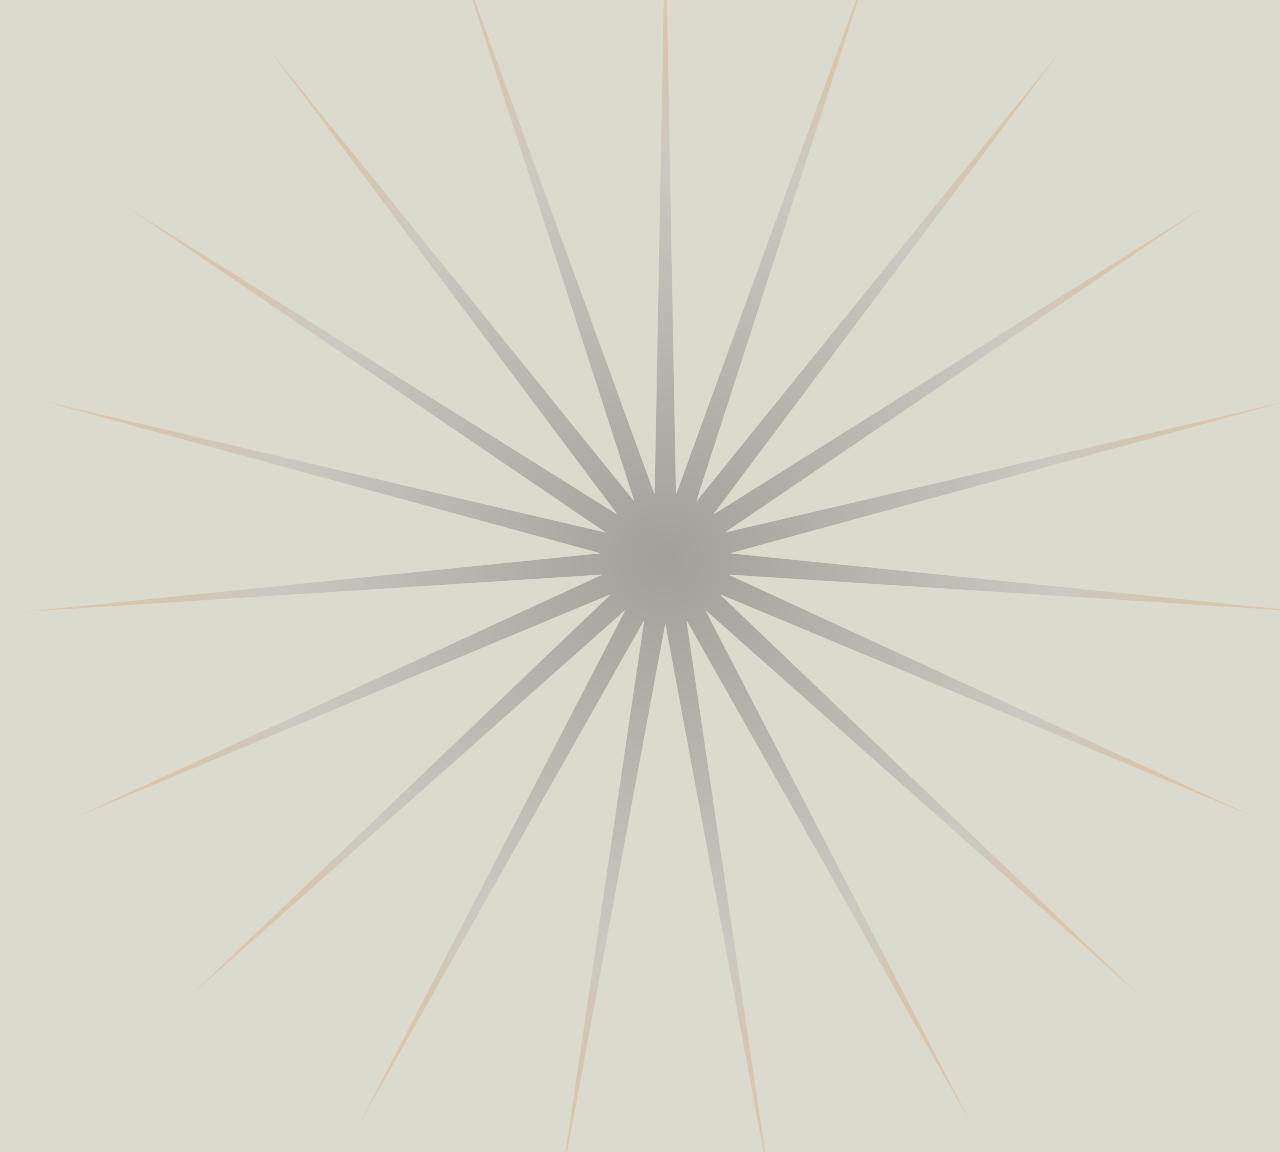

12:30 - 13:00 Lunch Break

13:00 - 15:45 Hacking Session #2

15:45 - 16:00 Submission Deadline

16:30 - 16:45 Jury Deliberation

16:45 - 17:00 Winner Announcement & Networking

TRACKS OVERVIEW - USE CASES

Track 1

UTXO Indexer-Selector

Bitcoin wallets and apps must manage many UTXOs. Passing them all to the frontend is inefficient and exposes privacy. An indexer-selector enables efficient indexing, smart selection, and aggregation for frontend performance.

Track 2

Rune-powered Midl x Xverse Solidity dApp

Create dApps that connect Solidity contracts with Bitcoin using Midl, midl.js, and Xverse for seamless integration

Prize Pool

\$5,000 USD total

- Split equally: \$2,500 per track
- Plus perks from Midl and Xverse

JUDGING CRITERIA

Track 1

25% **Correctness & Reliability**

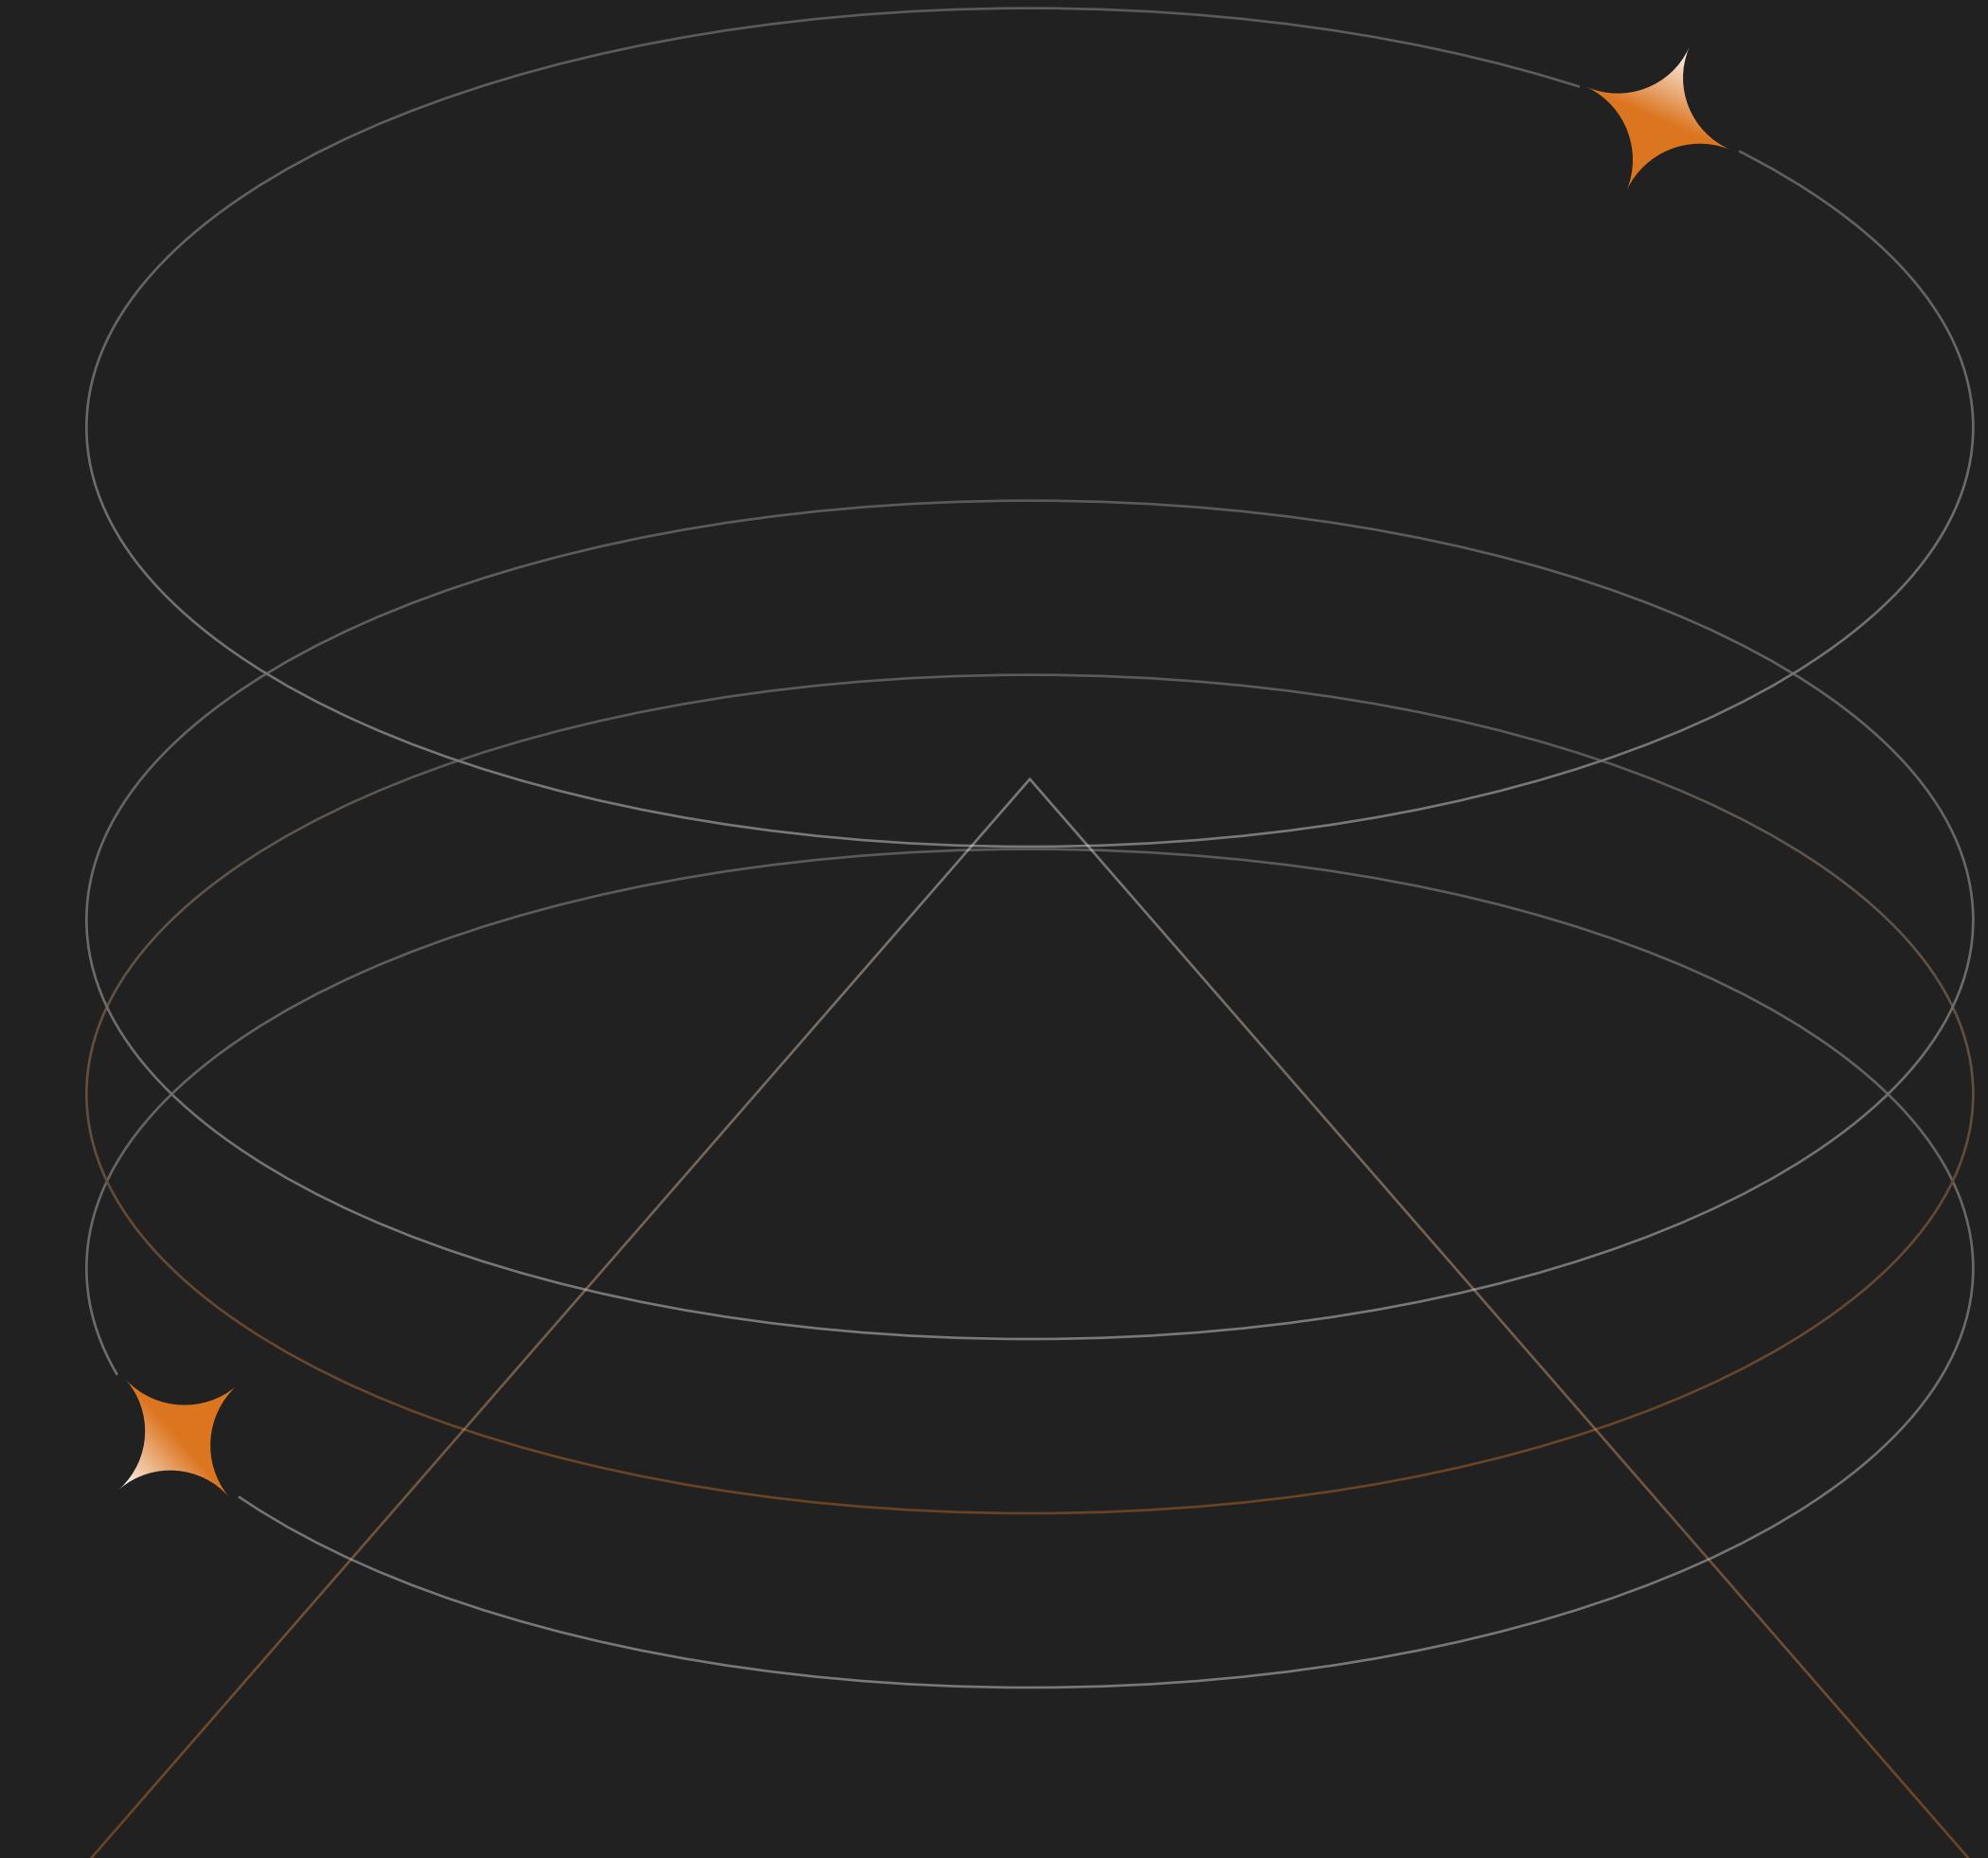

15% **Performance & Efficiency**

10% **Developer Experience**

10% **Code Quality & Portability**

25% **Advanced Node Integration**

15% **Presentation & Clarity**

JUDGING CRITERIA

Track 2

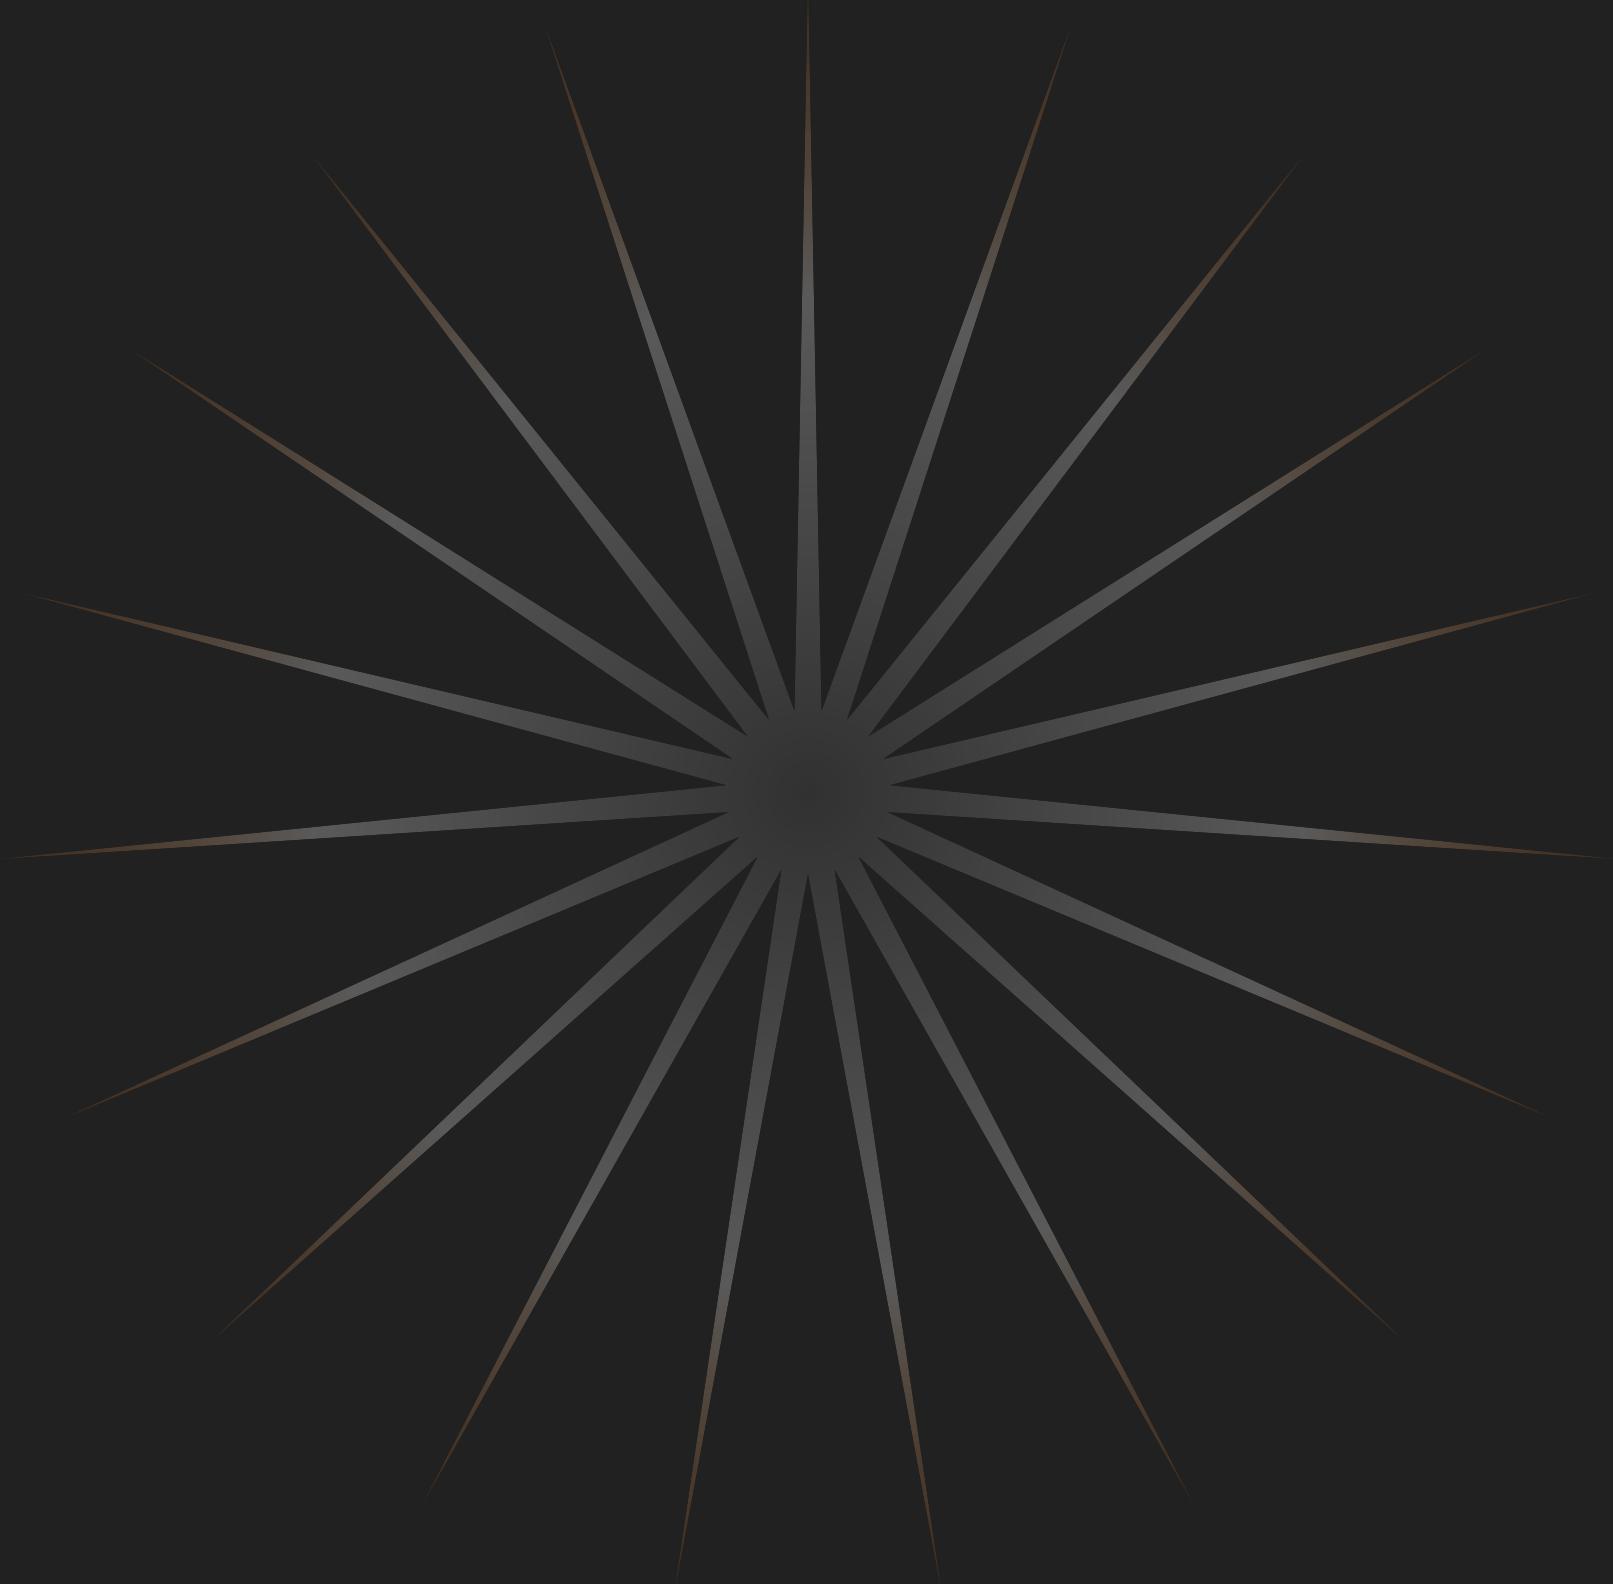

25% Innovation & Use of Runes

25% Integration with Midl.js & Xverse

20% Functionality & UX

15% Real-World Impact & Use Case

15% Presentation & Technical Clarity

RULES & SUBMISSIONS

- All hackers must provide  handles
- Submit via GitHub Pull Request to hackathon repo
- Deadline  **15:45**
- Each team:  project code + README in /submissions/<team-name>
- PR must list  team members & track
- Demo: 5 minutes + Q&A

RULES & TERMS

- Code submitted **must be licensed under MIT**
- Judges' decisions **are final** and not subject to explanation
- **Respect** venue and other participants
- Mentors **available** throughout the day

FOOD & NETWORKING

- Snacks provided through the day & pizza to be available at lunch
- SoHo House open for networking all day
- Non-hackers are welcome to join discussions & community

POWERED BY MIDL, BITCOIN SUMMIT
